GE1000/GE1000Li Intelligent Multi-Effects

MOOER has consistently pleased the guitar pedal market with its GE multi-effect range, and its latest addition, the GE1000, is set to be no exception. The GE1000, built with a futuristic and sleek “Walking Star” design, builds upon past GE products, offering an even larger range of guitar processing effects, preamps, amp simulators, and features than previous entries.

The GE1000 features: 5" touch-screen; 255 preset slots; 3rd-party IR support; on-board expression pedal; customisable advanced AI auto-equaliser; low-latency, 192kHz USB-C audio interface; stereo FX-loop; MIDI I/O; drum machine & looper (use independently or synchronised); wireless footswitch support for expanded functionality; and so much more!

The GE1000Li gives you all of the above with the addition of a 4750mAh Li-Ion battery for physical as well as creative freedom!

FEATURES
